### Getting Started

Go Math Tips for Parents:

- Start every lesson by working through the example problems WITH your student. Videos that do this are available on Think Central if you prefer that support. The “Share and Show” section should be done by your student with you still overseeing and offering support as needed. Then have your student do the “On Your Own” problems by themselves. Check for mistakes at when they have completed those problem and review/fix any mistakes at that time.
- Do not feel pressured to do every problem on every page. Some of the lessons have a lot of problems that are repetitive in structure. You can individualize the workload to meet the need of your student by picking a couple problems from each section at random, doing just odds or evens, etc.
- The lesson is in color and the “practice”/“review” are the gray pages at the end of each lesson. You can substitute these pages in. ***It is suggested that students completed all of the “Spiral Review” questions on the gray pages each day.*** This helps keep ALL grade level concepts fresh.
- Answer keys (TE) are available by logging into Think Central.

## Kindergarten Go Math Weekly Lesson Plans Semester 1

Week #	Teach lessons	Skills covered
1	Chapter 1 1.1-1.4	Counting and writing the numbers 1 through 4
2	1.5-1.7	Working with the number 5
